

Upload an SBML model or  
select a published model  
from BiGG Models or  
BioModels Database.

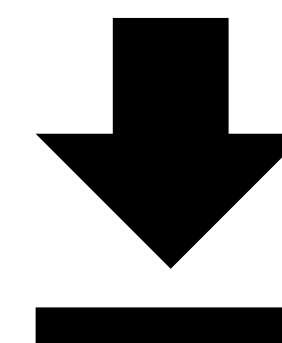

TRIM your model to  
get rid of currency  
metabolites or to focus  
on FBA results.

EXTRACT the  
Reaction-centric or  
Enzyme-centric  
network of the model.

# GEM<sub>tractor</sub>

Export the results  
as SBML, GraphML,  
GML, DOT, or CSV for  
subsequent analyses.
